TECHNOLOGY AND WELLNESS
GRAPHENE - SILK - SOYBEAN

The **Polionda Waterlily** mattress is a product for those who love **environmental sustainability** and contact with **nature** in fact the soya fibre cover ensures **resistance, breathability** and **protection** from bacteria.

The full-bodied filling of the cover is made of **GRS-certified** polyester, i.e. **recycled fibres** from the textile industry and from the separate collection of garments in accordance with the concept of **sustainable fashion**.

The filling is made even more functional by Graphene, which increases thermal comfort, and by Silk, which provides natural freshness.

The core base made of compact **Polilattex** supports the **Waterlily Memory Foam** layer, which **relieves the pressure of body weight** on the mattress.
